Understanding the 10 Day Detox Diet

The 10 Day Detox Diet is based on the principle that the body can heal itself when given the right tools. Dr. Hyman emphasizes the importance of nutrition in this healing process. The diet focuses on eliminating processed foods, sugars, and allergens while incorporating whole foods that nourish and support the body.

Key Principles of the Detox Diet

1. **Elimination:** The first step in the detox process is to eliminate foods that may contribute to inflammation, cravings, and weight gain. This includes:

- Sugar
- Gluten
- Dairy
- Processed foods
- Alcohol and caffeine

2. **Nutrient-Dense Foods:** The diet encourages the consumption of whole, nutrient-dense foods, such

as:

- Leafy greens
- Fresh fruits and vegetables
- Lean proteins (like fish and poultry)
- Healthy fats (such as avocados and nuts)
- Legumes and whole grains (in moderation)

3. Hydration: Proper hydration is emphasized throughout the program. Drinking plenty of water helps flush toxins from the body and supports metabolic processes.

4. Mindful Eating: Dr. Hyman advocates for being aware of food choices and portion sizes. Mindful eating helps individuals connect with their hunger cues and prevents overeating.
