- Warfare: Early warfare likely emerged as groups fought for territory, resources, and dominance. Evidence from sites like Çatalhöyük in Turkey shows signs of conflict.
- Ritualistic Violence: Some ancient cultures practiced ritualistic violence, believing it would appease deities or ensure fertility and harvests.

As societies developed, so did the sophistication of violence. Ancient civilizations, such as the Egyptians, Greeks, and Romans, showcased violence in various forms:

- Gladiatorial Games: In Rome, gladiators fought to the death for public entertainment.
- Military Conquests: Empires expanded through warfare, often resulting in the oppression of conquered peoples.

- Crusades: Religious wars initiated by Christians against Muslims in the Holy Land.
- Inquisition: A series of campaigns by the Catholic Church to root out heresy, often resulting in torture and execution.

The Renaissance brought about a shift in how violence was perceived, with a burgeoning sense of individualism and the questioning of authority. Yet, it did not eradicate violence:

- Political Assassinations: The period saw the rise of state-sponsored violence against dissenters.
- Witch Hunts: Thousands were executed across Europe based on superstition and societal fear.

The Modern Era: 18th to 20th Century

The modern era witnessed the evolution of violence on unprecedented scales, particularly with the advent of industrialization and modern warfare.
