Founding Myths and Early Settlement

The origins of Rome are steeped in myth and legend. According to tradition, Rome was founded in 753 BC by Romulus, who, along with his twin brother Remus, was said to be the son of Mars, the god of war. The story goes that Romulus killed Remus in a dispute, becoming the first king of Rome. This narrative encapsulates the martial spirit that would define Roman culture.

- Geographical Advantages: Rome's location on the Italian Peninsula offered several strategic benefits:
- Proximity to the Tiber River facilitated trade and transportation.
- The seven hills provided natural defenses against invasions.
- Its central location in the Mediterranean allowed for control over trade routes.

- Key Monarchs:
