2. Follow Traffic Rules: Abide by local traffic laws and regulations.
3. Stay Visible: Wear bright clothing and use lights during low visibility conditions.
4. Avoid Distractions: Keep your focus on the road and avoid using your phone while riding.
5. Practice Defensive Riding: Be aware of your surroundings and anticipate the actions of other road users.

Maintenance of the Ariel Rider Kepler

Regular maintenance is crucial for keeping your Ariel Rider Kepler in optimal condition. Here are some key areas to focus on:

Battery Care

The battery is one of the most important components of your electric bike. To prolong its lifespan, follow these guidelines:

- Charge the battery after each ride.
- Avoid depleting the battery completely before recharging.
- Store the battery in a cool, dry place during long periods of inactivity.

Tire Maintenance

Keeping your tires in good condition is vital for performance and safety. Check the following regularly:

1. Air Pressure: Ensure tires are inflated to the recommended pressure indicated on the sidewall.
2. Tread Wear: Inspect for signs of wear and replace tires if necessary.
3. Alignment: Check that the wheels are properly aligned to avoid uneven wear.

Brake and Gear Adjustments

Regularly inspect and adjust your brakes and gears to ensure smooth operation:

- Brake Inspection: Check brake pads for wear and replace them if they are worn down.

- Gear Shifting: Ensure that gears shift smoothly and adjust the derailleur if needed.

Troubleshooting Common Issues

Despite regular maintenance, issues may arise. Here are some common problems and their solutions:

Battery Not Charging

If your battery is not charging, try the following:

- Check the connection between the battery and charger.
- Inspect the charger for any signs of damage.
- Make sure the power outlet is functional.

Brakes are Not Responding

If your brakes feel soft or unresponsive:

- Check the brake pads for wear and replace if necessary.
- Adjust the brake cable tension if needed.

Motor Issues

If you experience issues with the motor:

- Ensure the battery is charged.
- Check the connections between the motor and battery for any loose wires.
