This sonata is part of a set of three sonatas published as Opus 10, which marked a transition from the classical style of Haydn and Mozart towards Beethoven's more personal and dramatic voice. The choice of C minor as the key is significant, as Beethoven often used this key to convey stormy and heroic emotions, a trait that appears prominently in this sonata. The period of composition coincides with Beethoven's increasing experimentation with form and harmony, setting the stage for his later, more revolutionary works.

Context Within Beethoven's Early Works

Opus 10 sonatas followed Beethoven's first published sonatas (Opus 2), and they demonstrate a growing complexity and emotional range. The Sonata in C minor particularly showcases Beethoven's early command over thematic development and structural innovation. It reflects the influence of his predecessors, yet it pushes boundaries through its intensity and dramatic contrasts. This sonata helped cement Beethoven's reputation as a powerful new voice in the classical music world.

Publication and Reception

The three sonatas of Opus 10 were published in 1798 and were dedicated to Baroness Josefa von Braun.
