Before you start, make sure to set up your machine correctly:

1. **Unpack the Machine:** Remove the Barista Pro from its packaging and place it on a flat, stable surface.
2. **Fill the Water Tank:** Open the water tank lid and fill it with fresh, filtered water. Make sure not to exceed the maximum fill line.
3. **Install the Bean Hopper:** Place your preferred coffee beans in the bean hopper and close the lid securely.

Step 2: Grinding the Beans

The next step is to grind your coffee beans:

1. **Select Grind Size:** Turn the grind size dial on the left side of the

machine to your preferred setting. A finer grind is better for espresso.

2. Choose Coffee Dose: Use the “Single” or “Double” shot button to select the amount of coffee you want to grind.

3. Start Grinding: Press the grind button to begin grinding. The coffee will fall directly into the portafilter.

Step 3: Tamping the Coffee

Tamping ensures that the coffee grounds are evenly compressed:

1. Distribute Grounds: Use a distribution tool or your finger to evenly distribute the coffee grounds in the portafilter.

2. Tamp Down: With a firm and even pressure, tamp the coffee grounds down. Ensure the surface is level for uniform extraction.

3. Clean the Edges: Wipe any excess coffee grounds off the edges of the portafilter for a clean seal.

Step 4: Brewing the Espresso

Now it's time to brew your espresso:

1. Lock the Portafilter: Insert the portafilter into the machine's group head and turn it to lock it in place.

2. Select Shot Size: Choose between a single or double shot using the control buttons.

3. Start Brewing: Press the button to start brewing. Watch as rich, aromatic espresso flows into your cup.

Step 5: Frothing Milk

If you want to make a milk-based drink, follow these steps:

1. Prepare the Steam Wand: Place a pitcher of cold milk under the steam wand.

2. Activate Steam: Turn the steam dial to activate the steam wand. Wait for the steam to reach optimal pressure.

3. Froth the Milk: Submerge the steam wand in the milk and angle the pitcher to create a whirlpool effect. Move the pitcher up and down to achieve a creamy froth.

4. Turn Off Steam: Once you have reached the desired froth, turn off the steam and wipe down the steam wand with a damp cloth.

Step 6: Serve and Enjoy

Finally, serve your espresso or milk-based drink:

1. Combine Espresso and Milk: Pour your frothed milk over the espresso to create a latte or cappuccino.

2. **Garnish (Optional):** You can sprinkle cinnamon or cocoa powder on top for added flavor.
3. **Enjoy:** Savor the deliciousness of your homemade espresso drink!
