- Cool containers exposed to fire with water spray to prevent rupture.

5. Accidental Release Measures

In the event of a spill or leak, immediate action is necessary to minimize exposure and environmental impact.

5.1 Personal Precautions

- Evacuate non-essential personnel from the area.
- Use appropriate personal protective equipment (PPE), including gloves and goggles.
- Avoid inhalation of vapors and ensure adequate ventilation.

5.2 Environmental Precautions

- Prevent the chemical from entering waterways or soil.
- Report spills to the appropriate authorities as per local regulations.

5.3 Cleanup Methods

- Absorb spill with inert material, such as sand or vermiculite.
- Place waste material in appropriate containers for disposal.
- Clean the area thoroughly with suitable solvents, ensuring all residues are removed.

6. Handling and Storage

Proper handling and storage practices are crucial for minimizing risks associated with bromine dichloromethane.

6.1 Handling

- Always wear appropriate PPE when handling the chemical.
- Ensure that work areas are well-ventilated to minimize inhalation risks.
- Avoid contact with skin and eyes, and do not eat, drink, or smoke in areas where bromine dichloromethane is handled.

6.2 Storage

- Store in a cool, dry, well-ventilated area away from incompatible materials, such as strong bases and oxidizers.
- Keep containers tightly closed when not in use.
- Use explosion-proof equipment and grounded containers to prevent static discharge.
