4. Self-Care and Burnout Prevention

One of the most critical aspects of leading a recovery program is the need for self-care. Training sessions addressed the risk of burnout and the importance of leaders taking care of their own physical, emotional, and spiritual well-being. Key strategies included:

2. Increased Awareness and Education

As trained leaders returned to their communities, they became advocates for recovery, raising awareness about the challenges faced by individuals struggling with addiction and mental health issues.
