Game Mechanics

The mechanics of Flappy Tower are straightforward but demand precision and timing. Here's how it works:

1. **Controls:** Players control a character that flaps its wings to ascend. Tapping the screen or pressing a key causes the character to flap, while gravity pulls it down when not flapping.
2. **Obstacles:** As you ascend, you encounter various obstacles, such as moving platforms and other characters. Avoiding these obstacles is crucial to maintaining your height and continuing your ascent.
3. **Scoring:** Points are awarded based on how high you can climb. The higher you go, the more points you earn. Players can compete for high scores, adding a competitive element to the game.
