- A flat, clean area for assembly

Step-by-Step Assembly Guide

1. Lay Out All Parts:

- Unbox the crib and lay out all parts on a flat surface. Check the instruction manual to ensure you have all the components.

2. Assemble the Crib Sides:

- Take the two long side panels and attach them to the end panels using the provided screws. Make sure to tighten them securely but avoid over-tightening, which can damage the wood.

3. Attach the Mattress Support:

- Position the mattress support brackets at the desired height (the crib should have multiple height settings). Use the screws to secure the brackets in place.

4. Install the Back Panel:

- Attach the back panel by aligning it with the side panels and securing it with screws. Ensure it's flush and tightly fitted.

5. Double-Check Stability:

- Once the crib structure is assembled, check for any wobbling or loose parts. Tighten screws as necessary.

6. Finish Up:

- If your crib comes with additional features, such as a changing table attachment or storage drawers, follow the specific instructions for those components to complete the setup.
